Placencia, Belize

Welcome to Los Porticos Villas! We are located in Placencia Village, a place known for its friendly people, who are as diverse as the people who chose to visit our little corner of paradise from around the world. Placencia is also known for its sandy beach and The Sidewalk, which was featured in the Guinness Book of World Records as the narrowest main street in the world. In its earlier years, Placencia was a great fishing village with most local men working in the fishing industry. This was a main source of income for local families, with fish being sold to nearby Honduras and to the Fisherman's Coop in Belize City. The sidewalk was used to transport the local catch from the pier throughout the village with wheelbarrows. You can purchase the 'catches of the day', such as snapper, conch, crab and lobster, from the fishermen at the main pier at the tip of Placencia Village.

Placencia also has great local bars and restaurants offering delicious food and drinks, with friendly staff that are sure to show you a great time. Most places offer live music with local bands and DJs playing music in the early evening. Be sure to try some local dishes, such as the traditional rice and beans, fried fish, stewed chicken, fry jacks, and much more at any one of the restaurants located on the beach or along the main road.

Guest Information

Air Conditioning

Each villa has three or four individually controlled air conditioning units. To optimize the cooling of the air conditioning units, please close the windows and doors in the villa. In addition, humidity can be reduced by keeping the temperature around 22 degrees Celsius/72 degrees Fahrenheit. **When leaving for the day for a tour or a prolonged time, please turn off the air conditioning. We appreciate your efforts to conserve electricity.**

Airstrip Shuttle Service

Complimentary shuttle service is provided between the Placencia airstrip and Los Porticos Villas. Please advise the office when you require return shuttle service to the airstrip.

Alcoholic Beverages

Beer, liquor and wine can be purchased at the various grocery stores in the Village. Beer, soft drinks and wines are available for purchase at the front office.

Banks and ATM Service

There are two banks in Placencia Village: *Atlantic Bank* and *Belize Bank*. *Atlantic Bank* is located in a large free-standing building just south of the water tower and *Belize Bank* is located at the Placencia Plaza in the village across from the soccer field. ATMS are located in the bank buildings and dispense BZE currency. Service charges apply for ATM use.

Barbequing

Barbequing is not permitted on the verandas of the villas or on Los Porticos property.

Beach

The best beaches in Belize are on the Placencia Peninsula. Placencia has safe sandy beaches, with small tides, and no dangerous undertows. Beaches in Belize are public. Approximately 100 feet offshore, following the edge of building one (with small pool), there is a small coral reef with varied marine life. The beach is cleaned and raked daily. Debris washed up on the beach is brought in by the ocean and does not originate locally.

Jellyfish are occasionally found in this area, generally in late April and early May. Clear jellyfish are fairly harmless. Small brown jellyfish may sting and can result in skin irritation and redness. Dousing with vinegar (or other acidic liquid) usually relieves discomfort.

Stingrays feed on sea grass. Be alert when walking in sea grass in the water or walking on washed-up sea grass on the shore. All stingray injuries should be medically assessed to ensure no parts of the stingray barb or venom sack remains. In addition, clean and soak the affected area (usually around the ankle) in water as hot as you can tolerate for about 1.5 hours

Sargassum is an algae which originates in the Sargasso Sea in the Atlantic Ocean around Bermuda. The Atlantic is home to two species of sargassum (*S. natans* and *S. fluitans*) which reproduce vegetatively and travel on the ocean's surface. These two species are also found throughout the Caribbean and the Gulf of Mexico, and are transported by the Gulf Stream. The sudden invasion of tons of algae on Caribbean shores are the result of changing weather patterns and warmer temperatures in the region. According to marine biologists, cooler autumn weather traditionally slows the algae's growth, plus changes in ocean circulation patterns, water temperature and nutrient systems typically keep the weed at sea. As the sea temperature increases, Sargassum is more likely to make its way to the shores of Caribbean beaches.

Beach towels are available at the office. You can trade in your towels for fresh ones during your stay.

Eco-conscious

Please conserve electricity and water as much as possible. Turn off the air conditioning units when not in the villa. To obtain maximum benefit from the air conditioning units, shut windows and doors in the villa. In addition, humidity can be reduced by keeping the temperature around 22 degrees Celsius/72 degrees Fahrenheit. We appreciate your efforts to conserve electricity and water.
